

CMPT 370
Group A5
Oct 20th Group meeting

This will be a brainstorming meeting. We will be brainstorming some class ideas and drawing out some rough UML diagrams to better decide how our UMLs should look.

Thursday October 20th, 3:00pm – 5:00pm

Total time: 2 hours

Attendance: All group members were in attendance

During the meeting: Spent the time drawing UMLs and deciding how they are associated with each other and what other classes we should include to make the system more efficient and functional. In the end we made decisions to work together on assembling the UMLs October 21st and hopefully finish the Design document by October 22nd.
